

Rowan Class Celebration Newsletter

Investigating our alien invasion environment.

Exploring adding and subtracting using leaves on autumn trees. 😊

BEEGU made it back to our classroom safely!

Receiving our Christingles at Church.

Running from country to country in the United Kingdom on our playground.

Things to celebrate this term:

This term we have lots to celebrate. As Christmas approaches we have been lucky enough to spend time rehearsing and showing our Nativity to our grown-ups. All the costumes looked amazing and we had such a fantastic time learning the songs and performing them too! Well done to everyone!

Rowan Class Attendance Prize

We have continued our success from Term 1 and won the attendance prize for a second time! The children were so excited to win the class attendance prize for a second time. We won an extra playtime which we spent doing Christmassy things and spoke in celebration assembly about our week with Groot. Keep up your hard work!

This term:

In Literacy we learned through the story 'BEEGU'. We had a fantastic start to the term with an alien invasion in our classroom. We created our own planets, spaceships and BEEGU posters. We were able to do lots of role-play to understand our characters feelings and create our own alien and planet to star in our very own story. We used lots of adjectives to describe our alien and planet in our stories.

In Maths have been focussing on addition and subtraction. We have been finding the total and the difference between groups of objects as well as comparing different groups. We now understand how to use a part whole to add and subtract.

In Topic our focus has been Geography and our theme, carried through Literacy was 'Alien Invasion'. We searched through our school, through the United Kingdom and through the continents and oceans of the world to find our missing friend BEEGU. Eventually she landed safely back in our classroom.

Next term we are:

In Literacy, learning through the story 'Traction Man'. We will be exploring a superhero's perspective of the world.

In Maths we will be building on our place value knowledge and focussing on numbers 10 to 20. We will be exploring, comparing and problem solving.

In Topic our focus will be History beyond living memory 'Extinct'. We will learn about the creatures who roamed the land before our living memory and learn about different landscapes and reasons dinosaurs became extinct.

Topic words to learn: Fossil, Dinosaur, Extinct, Skeleton, Bone, Jurassic, Mesozoic Era, Evolve, Ice Age, and Meteor.
