

# Beech Class

## Celebration Newsletter

Beech Class have had another fantastic term! It is incredibly pleasing to see how far the children are coming on with their learning and understanding in all subjects. I really hope this continues next term!

I hope you all have a lovely, relaxing, well- deserved Easter Break!

I have continued to be incredibly proud of the class for how hard they have been working to complete Accelerated reader quizzes in order to try and climb our Accelerated reader Beech Tree!

We now have over 18 people in the class who have read over 150, 000 words since the start of year which is brilliant! Well done to Finn, Millie, Riley, Kenny, Hope and Alfred for reading over 500, 000 words and a very big well done to Tijesupemi who has read over 2.000. 000 words!

This term the children have enjoyed being able to take part in many experiments and investigations in science. Our topic this term was properties and changes in materials. We looked at the properties of different materials and we explored thermal and electrical conductors and insulators as well as investigating dissolving.

This term in Topic we were looking at the UK, Spain and Canada. We explored the physical and human geography of each country and we then looked at the similarities and differences between the countries. Next term we will be exploring the Mayans!

This term we were lucky enough to have taken part in the Tetrahedron challenge with the Year Sixes. We all worked really hard and enjoyed the experience. Well done to Kenny, Finn and Ben A who will be going to the finals.

We have been very lucky this term to have experienced two different sports taught by external teachers. The children had a 45 minute taster session in boxing and were lucky enough to have had 6 1 hour sessions in cricket, taught by Ian. The children absolutely loved the sessions and it was great to watch them flourish within the sport.
