

Rowan Class Celebration Newsletter

What a busy term!

We have loved learning about Dinosaurs and have embraced everything to do with them. We have especially enjoyed all of the creative activities we have managed to fit in.

Clay fossils
Clay dinosaurs
Shape dinosaur pictures
Our dinosaur dance workshop

Ask your children about herbivores and carnivores, can they tell you what the terms mean?

Will, the Dinosaur man was fantastic and taught us lots of things about fossils and dinosaurs. He brought lots of interesting artefacts to school which we all found fascinating.

In Science this term we have been learning about plants. Everybody planted a bean and most of those have successfully grown.

Mrs Jeffery's hasn't even started to shoot!

Looking forward to Term 4

In term four our topic is about London. We will be comparing London to Lower Halstow and learning about important landmarks.

We will continue to learn about plants in science and will be looking at our local environment to find out about spring flowers and trees.

Please continue to read with your child and discuss their books as often as you can.

Date for your diary

Thank you for our attending our Dinosaur museum, hopefully you enjoyed it as much as us!

End of term express event: 26.3.20 at 2.30pm.
